Computer Entry of Actual Weights

Go to www.trackwrestling.com

Use the Quick Search on the left to type in leads. Choose one of the tournaments.

Event Name: [Provo Classic](#)

Choose User Type: [Statistician](#)

Enter User Name: [provo \(all lower case\)](#)

Enter Password: [classic \(all lower case\)](#)

There are two ways to enter weights:

Option 1 (use this option if you have kids from multiple clubs):

Click: [Search](#)

Enter the [first 3 letters](#) of Wrestlers Last name (i.e.: LaMont enter [LaM](#)) click [Go](#) or the [enter](#) key

Click on the Wrestler (i.e.: [Grant LaMont](#))

Enter the actual weight (i.e.: [152.5](#))

Click: [Save Participant](#)

Option 2 (use this option if you have the majority of kids from one club):

Click: [Teams \(on left of the screen\)](#)

Click: [on your team i.e.: Payson](#), A list of all of the wrestlers for your team should come up. The list will be sorted by group and then by alphabetical.

Click on the Wrestler

Enter the actual weight (i.e.: [152.5](#))

Click: [Save Participant](#) (it will take you back to your team).

Continue this process for your entire team (make sure you get all kids because some may have signed up under a different team name)

To verify that it worked click on Teams again (on the left side) and choose your team and all the weights should be listed.

I would suggest trying this for a couple of weights and verify that it worked.

This way is much faster than searching for individual wrestlers and entering the weight.

You could use both methods if you are weighing in kids from your club and other clubs.

Sincerely,

Michael Olsen

(Thanks to Craig LaMont for the instructions.)
